

Login into the gateway server as a gateway user with bash shell

664 Jisna Joseph December 29, 2023 [General](#) 922

How to login into the gateway server as a gateway user with Bash shell?

1. Add a [gateway user](#) in ezeelogin
2. **Change the shell of the gateway user to /bin/bash.**

3. Run the below command to **confirm the shell of the gateway user.**

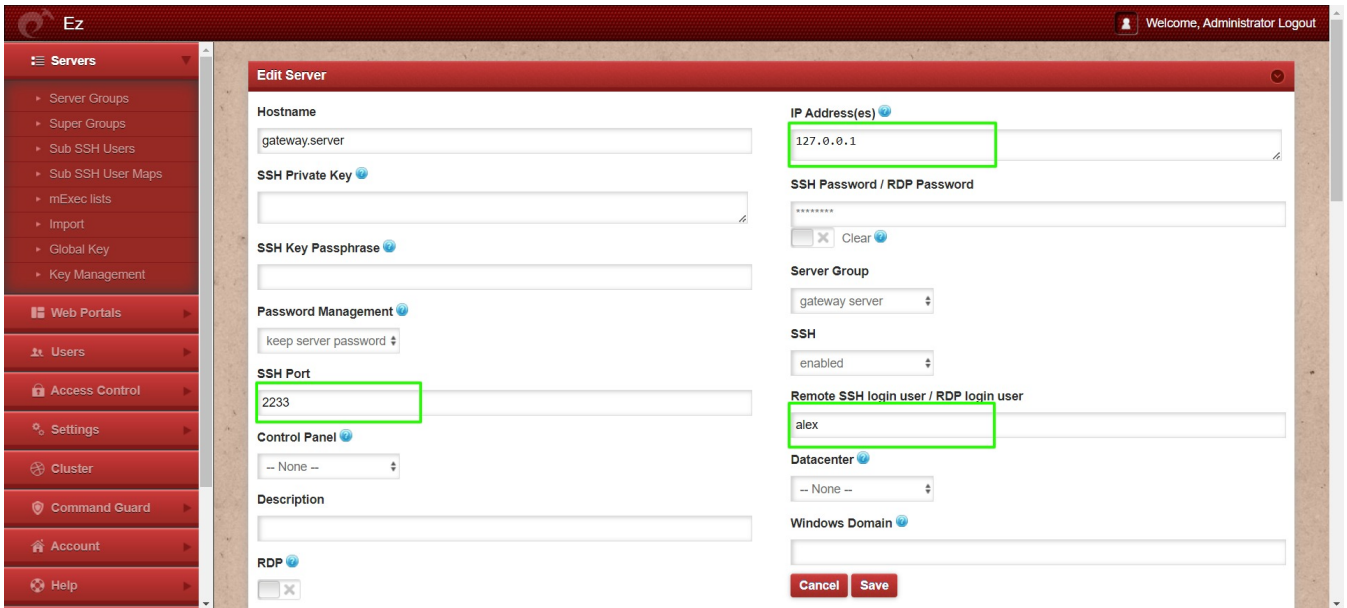

4. Edit the sshd configuration file of the gateway server and **add a new port number and force the user to use the ezsh shell with default port 22.**

Refer article to [assign a new port number and force to use the different shell of the Linux user.](#)

5. **Add the gateway server** to the Ezeelogin GUI as the remote server **with the new port number.**
Refer below screenshot.

6. Login to ezsh and press the tab key to view the server details. Refer below screenshot.

7. Login to the server, and the gateway user will be **logged in with the bash shell on the gateway server**.
