The advertisement features a dark green background with white text. On the right side, there is an illustration of a person sitting on a server rack, with a laptop and various data visualization elements like charts and a cloud. The overall theme is IT security and monitoring.

openSUSE is a free and open-source Linux distribution developed by the openSUSE project. It is offered in two main variations: Tumbleweed, an upstream rolling release distribution, and Leap, a stable release distribution which is sourced from SUSE Linux Enterprise

HOW TO UPGRADE PHP TO 8.2 IN OpenSUSE 15

Step 1. Add PHP Repository for PHP 8.2 packages and refreshes the package manager's data.

Run the following command

```
root@gateway:~# sudo zypper addrepo -f  
https://download.opensuse.org/repositories/devel:/languages:/php/openSUSE_Leap_15.4/  
PHP-OpenSUSE
```

```
root@gateway:~# sudo zypper refresh
```

Step 2. Install PHP 8.2 from the added repository: Adjust the package name accordingly based on what's available in the repository.

```
root@gateway:~# sudo zypper install php8-8.2.15-lp154.150.1.x86_64
```

Step 3. Check the PHP Version. This should display the version of PHP you installed.

```
root@gateway:~# php -v
```

```
ec2-user@ip-172-31-9-146:~> php -v  
PHP 8.2.15 (cli) (built: Jan 18 2024 12:00:00) (NTS)  
Copyright (c) The PHP Group  
Zend Engine v4.2.15, Copyright (c) Zend Technologies  
ec2-user@ip-172-31-9-146:~>
```
