

Upgrade to php version 8.2 in SUSE Linux Enterprise Server 15

675 Manu Chacko February 5, 2024 [Installation](#) 1749

HOW TO UPGRADE PHP TO 8.2 IN SUSE Linux Enterprise 15(SLES)

SUSE Linux Enterprise Server (SLES) is a Linux-based server operating system created and maintained by the German-based organization, SUSE. It is part of the enterprise product family and is designed for server environments known for its stability and comprehensive support for enterprise workloads.

1. Add PHP Repository for PHP 8.2 packages and refreshes the package manager's data.

Run the following command

```
For SLES 15 SP5 run the following as root :  
zypper addrepo https://download.opensuse.org/repositories/devel:languages:php/SLE_15_SP5/devel:languages:php.repo zypper  
refresh
```

For SLE 15 SP4 run the following as root :

```
zypper addrepo https://download.opensuse.org/repositories/devel:languages:php/SLE_15_SP4/devel:languages:php.repo zypper  
refresh
```

2. Install PHP 8.2 from the added repository:

```
root@gateway:~# zypper install php8
```

3. Check the PHP Version. This should display the version of PHP you installed.

```
root@gateway:~# php -v
```

```
ec2-user@ip-172-31-9-146:~> php -v  
PHP 8.2.15 (cli) (built: Jan 18 2024 12:00:00) (NTS)  
Copyright (c) The PHP Group  
Zend Engine v4.2.15, Copyright (c) Zend Technologies  
ec2-user@ip-172-31-9-146:~>
```
