How to hide the server details for a particular user group or user

To hide server details for a specific Ezeelogin Gateway user group or user, navigate to the "Access Control" section, then proceed to "User-Action/user group" and disable "View Server Details".

To conceal the server details from a user, **uncheck 'View Server details'** under Access-Control >> User-Action >> Server. Refer the below screenshot

To hide the server details from a **user group**, uncheck 'View Server details' under **Access-Control >> UserGroup-Action >> Server**. See the screenshot below for reference.
