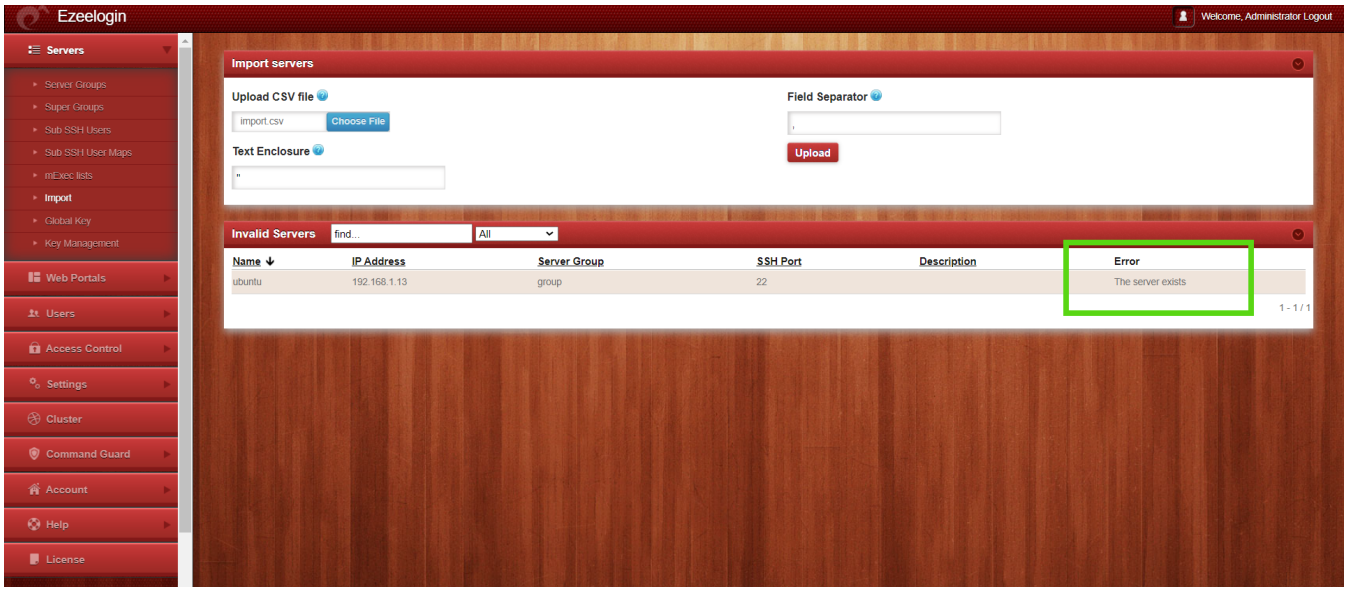
Common errors while importing servers

688 Lekshmi September 4, 2024 Common Errors & Troubleshooting 943

Approach for managing '**Server Already Exists**' and '**Duplicate Entry**' errors

Encountering the **server already exists** error while importing a server in the Ezeelogin GUI indicates that the server is already present in the Ezeelogin Gateway server.



Similarly, if we attempt to add a server with the same name as an already existing server, it may cause a "**duplicate entry**" error in MySQL. This means the value you are providing for a specific column must be unique.

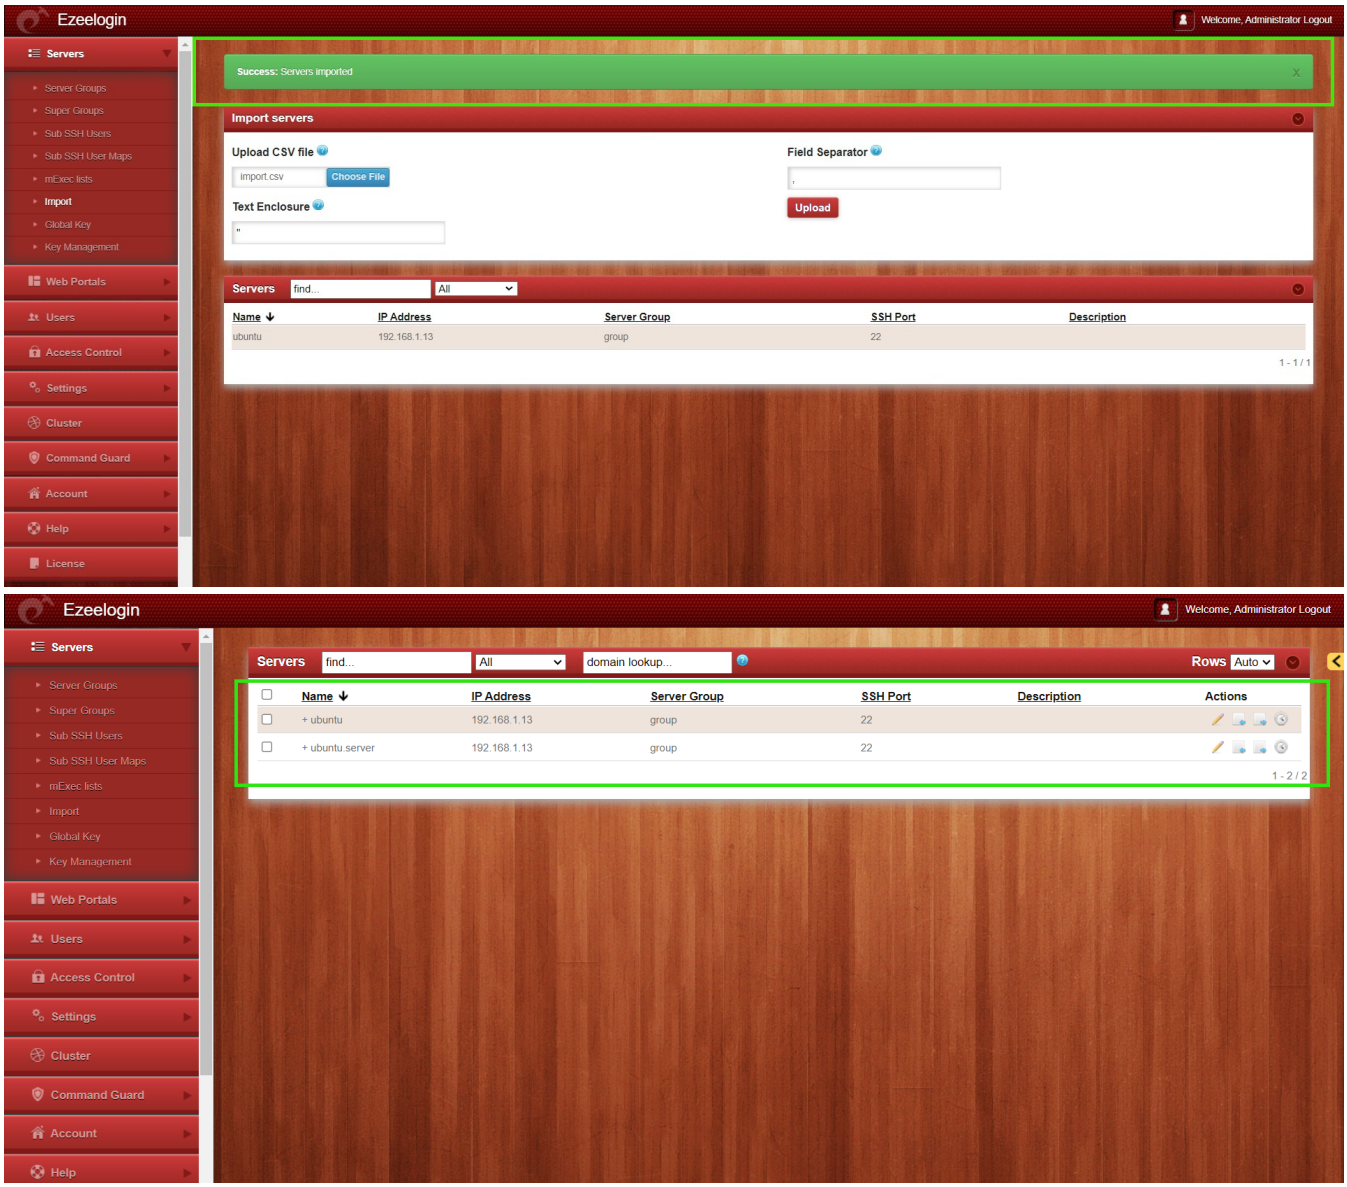
Description
Error
ubuntu 192.168.1.13 group 22 The server exists
ubuntu 192.168.1.13 group 22 Duplicate entry
ubuntu 192.168.1.13 group 22 Duplicate entry
1 - 3 / 3

To fix the error and successfully **import the server into Ezeelogin, change the hostname to a unique one that is not identical to any of the servers already added** in Ezeelogin.



In the above screenshot the name of existing server was **changed to** "**ubuntu.server**". After this change, another server named "**ubuntu" was successfully** imported.
