

How to implement themes for your interface design

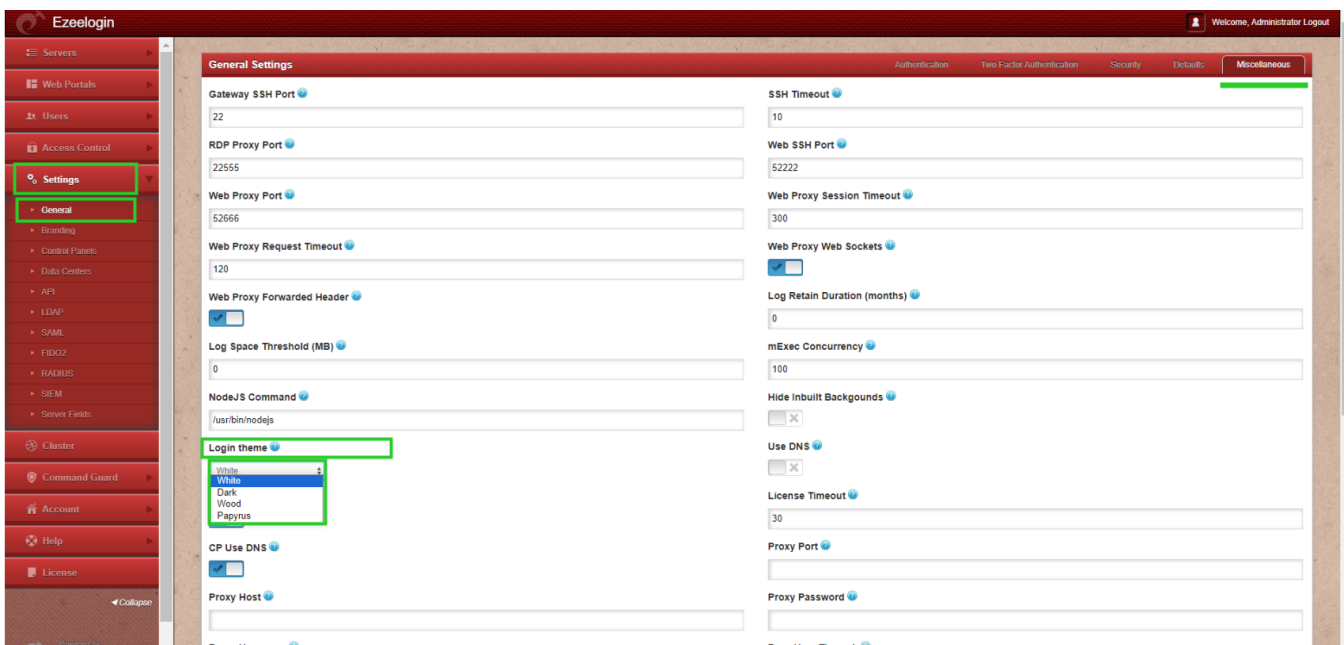

691 Rakhi November 22, 2024 [Features & Functionalities](#) 736

How can you set the login page themes, background, GUI themes and login page notice in the Ezeelogin web GUI?

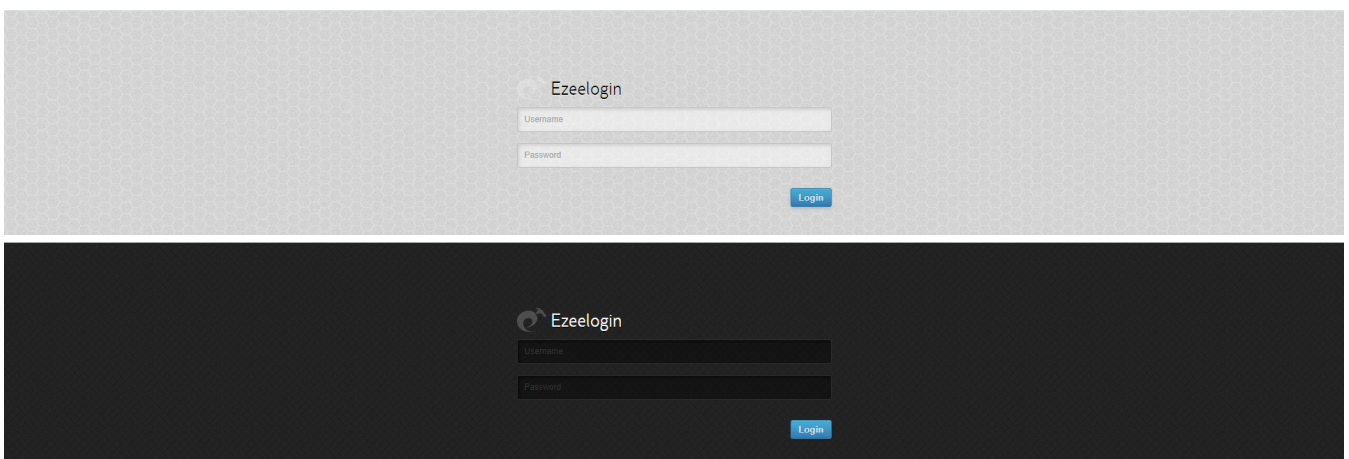

1. Add a theme to the login page of WebGUI.

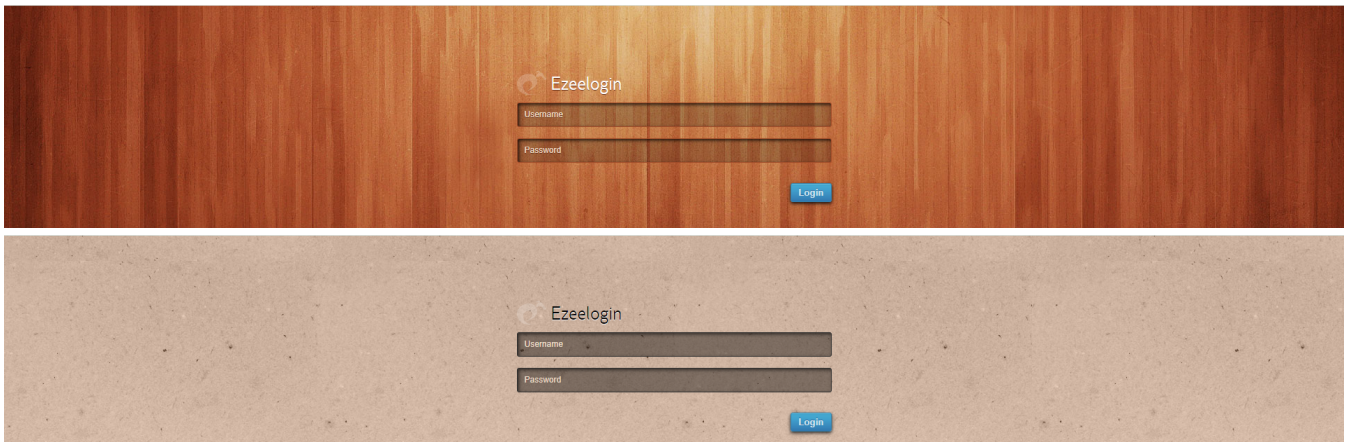

The following steps would reflect globally on all users.

Step 1(A): Navigate to **Settings > General > Miscellaneous > Login theme** parameter > choose any of the options given (**white/Dark/Wood/Papyrus**) and Save it.

Step 1(B): Refer to the screenshots for login theme interfaces:

2. A sequential guide to adding a theme to the webGUI pages.

Step 2(A): Navigate to **Account > Theme** > choose the listed themes and set them as default. (Smooth, Papyrus, sky, white, wood, Green glow)

Setting them as the default will apply changes globally to all users.

Step 2(B): If you opt not to set it as the default theme, changes will only affect individual users.

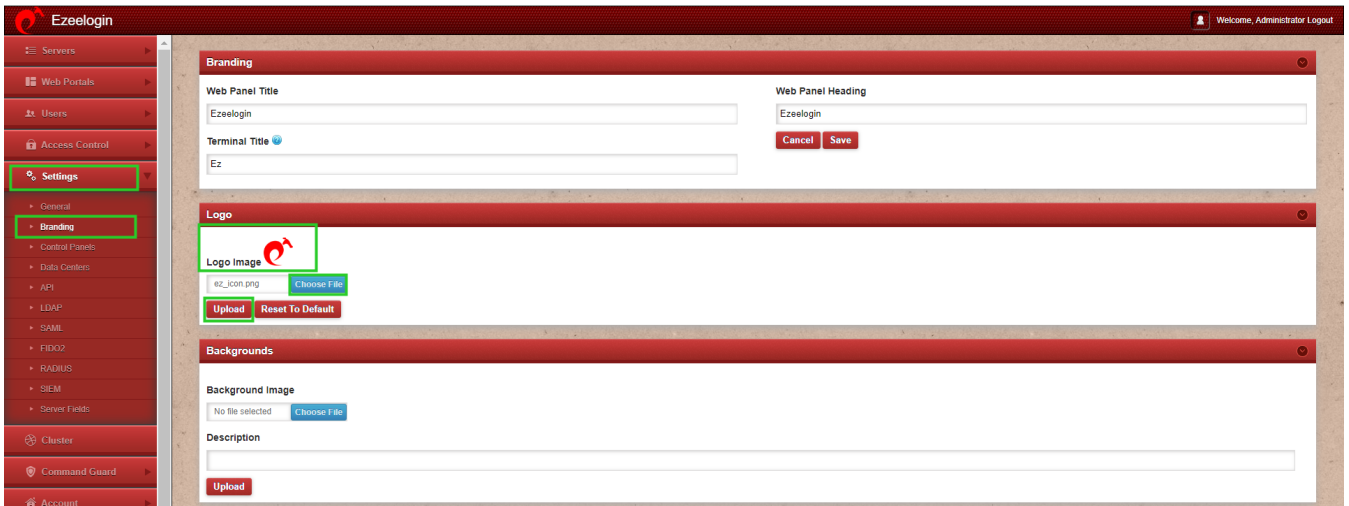

3. Set logo in Ezeelogin web panel

It is also possible to incorporate a logo into the Ezeelogin Panel and include your brand name for branding purposes.

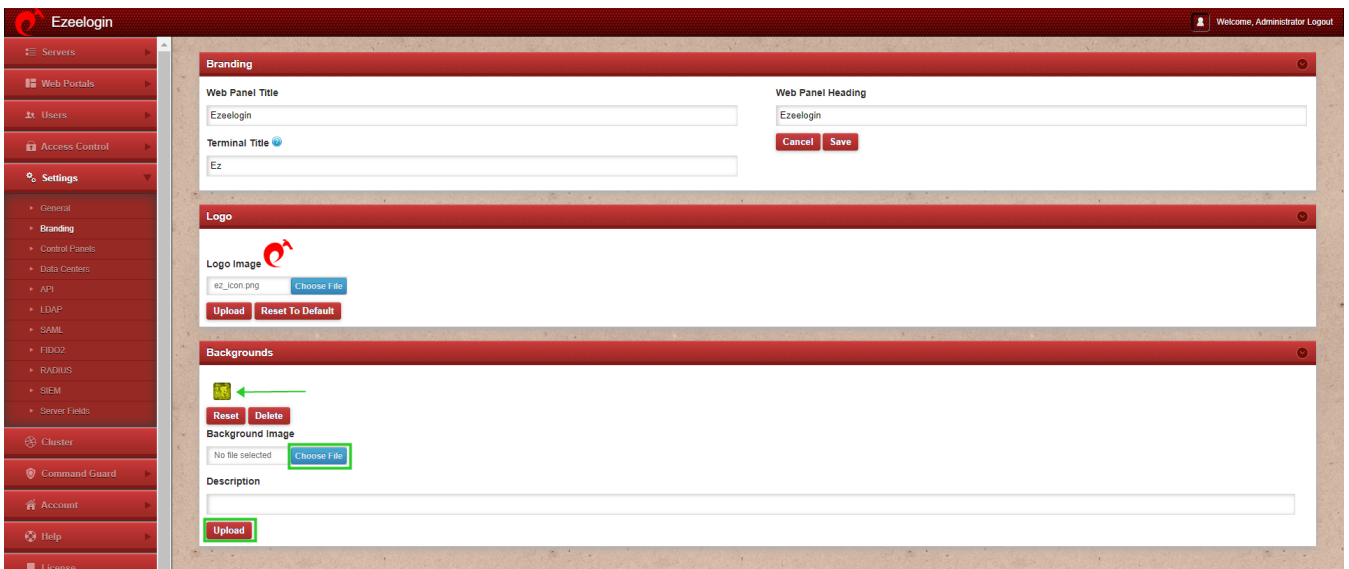

The following steps would reflect globally on all users.

Step 3(A): Navigate to **Settings > Branding > Add logo** by choosing the file from your desktop and then upload it.

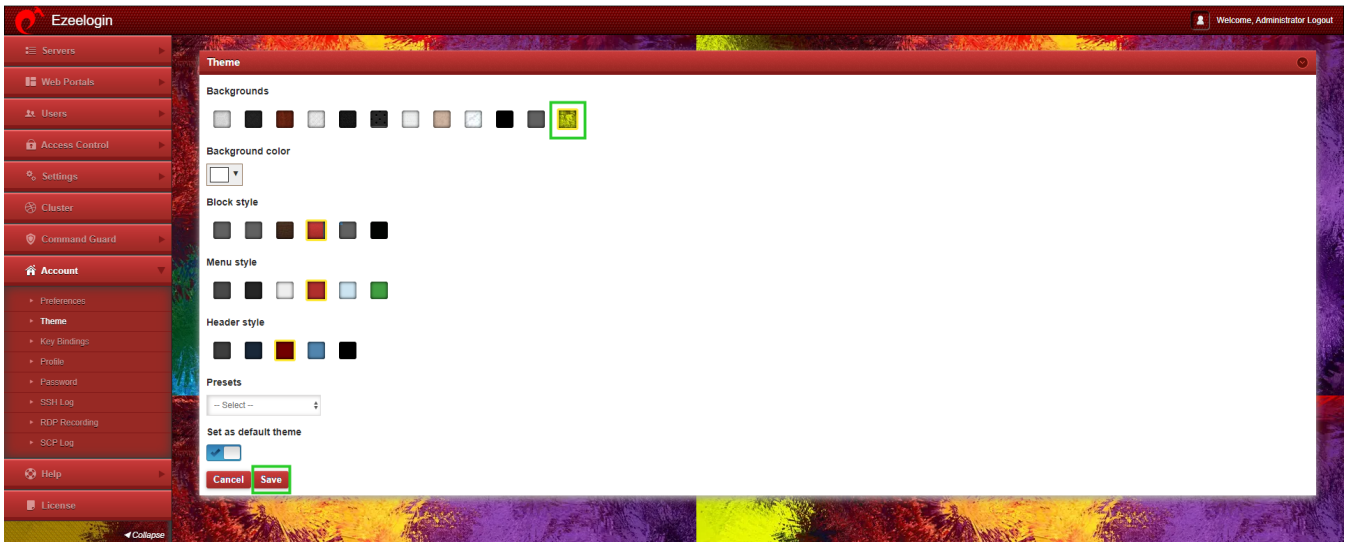

4. Customize the background image

Step 4(A): Choose the file from your **desktop** and add a **description** and **upload** it.

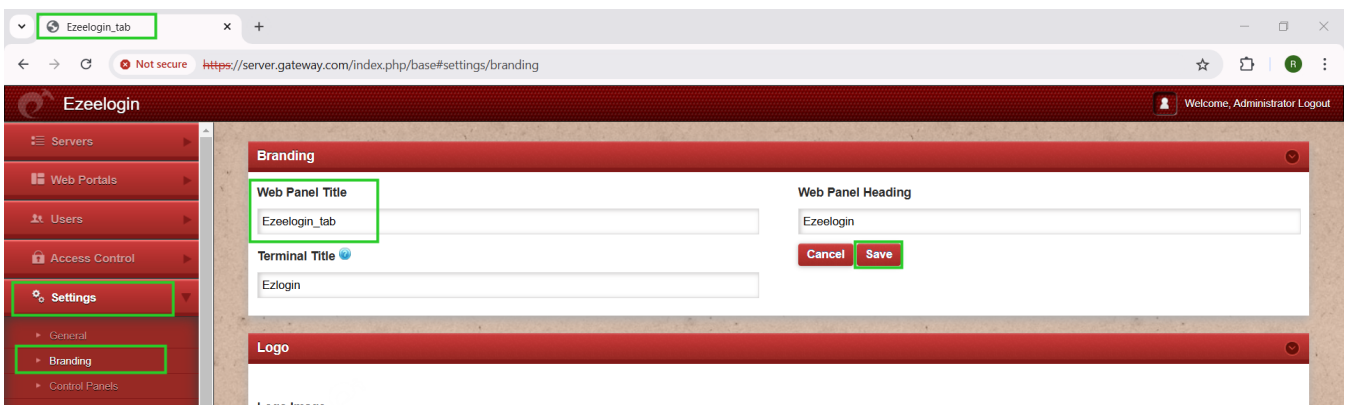

Step 4(B): Following this you will see the uploaded background image in the **theme section** under **Account**.

Step 4(C): Click on the uploaded background image and save it.

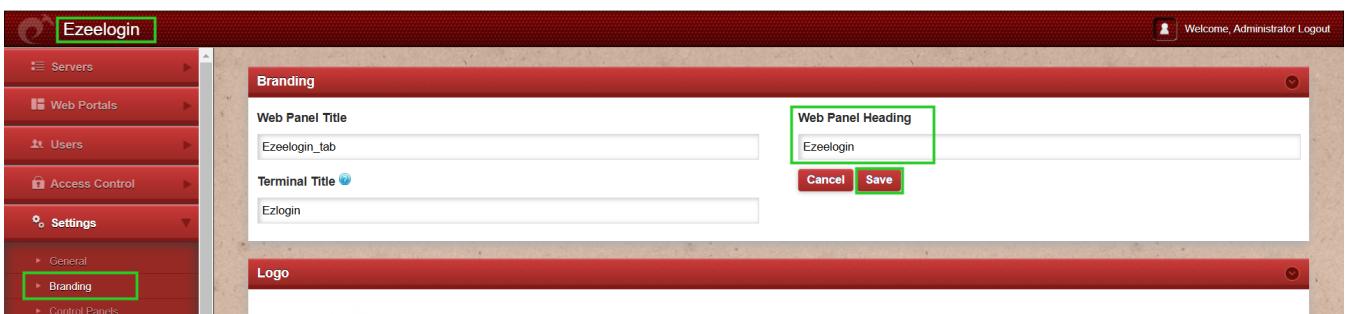

5. How to add/change the Web Panel Title.

Navigate to *Settings > Branding > Web Panel Title > add/change the title > Save it.*

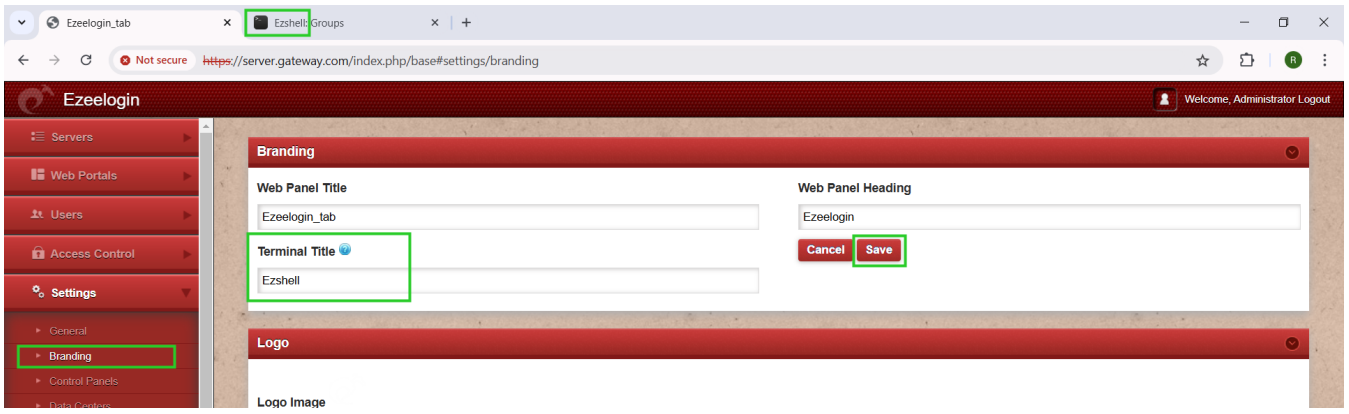

6. How to change the Web Panel Heading.

Navigate to *Settings > Branding > locate the Web Panel Heading > add the respective heading and Save it.*

7. How to change the Terminal Title.

Navigate to *Settings > Branding > locate the Terminal Title and add the respective shell title > Save it.*
