

# Adding Users Exclusively to Databases

712 Rakhi August 17, 2024 [Features & Functionalities](#) 538

## How to add users to the database.

**Overview:** This feature allows you to create database users in Ezeelogin for users that already exist on your system.

For instance, if you have a user "David" who already has an account on your system server, by enabling this feature("Add user to database only") you can directly create a corresponding database user for David in Ezeelogin without the need to set up the user("David") account again manually. This will simplify the process by bypassing the manual creation of a system user.

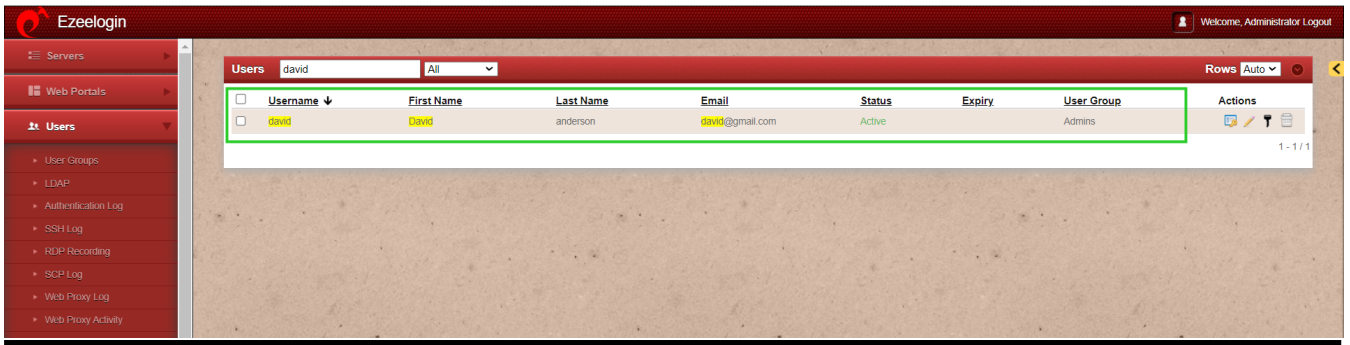

Refer to the user add the manual for a detailed description: [Manual](#)

Ex: Here we have a system user named "David" in a [gateway server](#). And we need to create the same user in Ezeelogin as a [gateway user](#).

You need to create the gateway user by enabling *add user to database only* parameter. Refer to the
