

# Adding Plesk as Control Panel

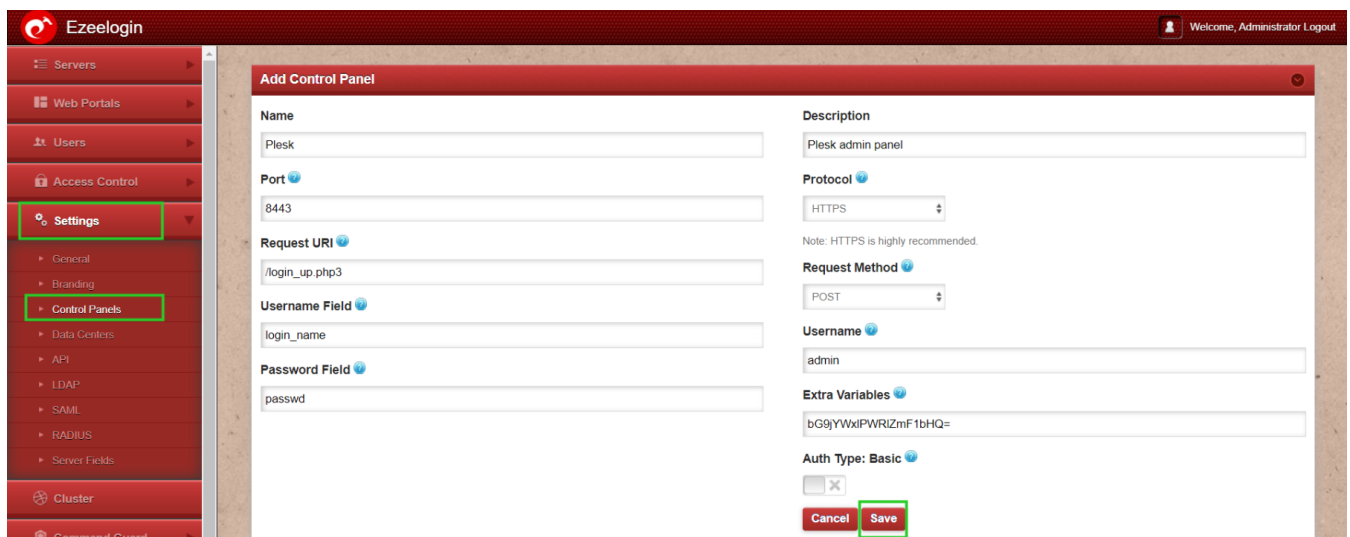

741 Rakhi October 24, 2024 [Features & Functionalities](#) 383

## How to add Plesk as control panel

**Overview:** This article outlines the steps to integrate Plesk with Ezeelogin software as ControlPanel.

**Step 1:** Create a [Plesk account](#).

**Step 2:** After setting Plesk. Login to Ezeelogin GUI -> Settings -> Control Panel. You can use the screenshot below as an example to configure Plesk.

The screenshot displays the Ezeelogin web interface. On the left, a navigation menu is visible with 'Settings' and 'Control Panels' highlighted. The main content area shows a form titled 'Add Control Panel' with the following fields and values:

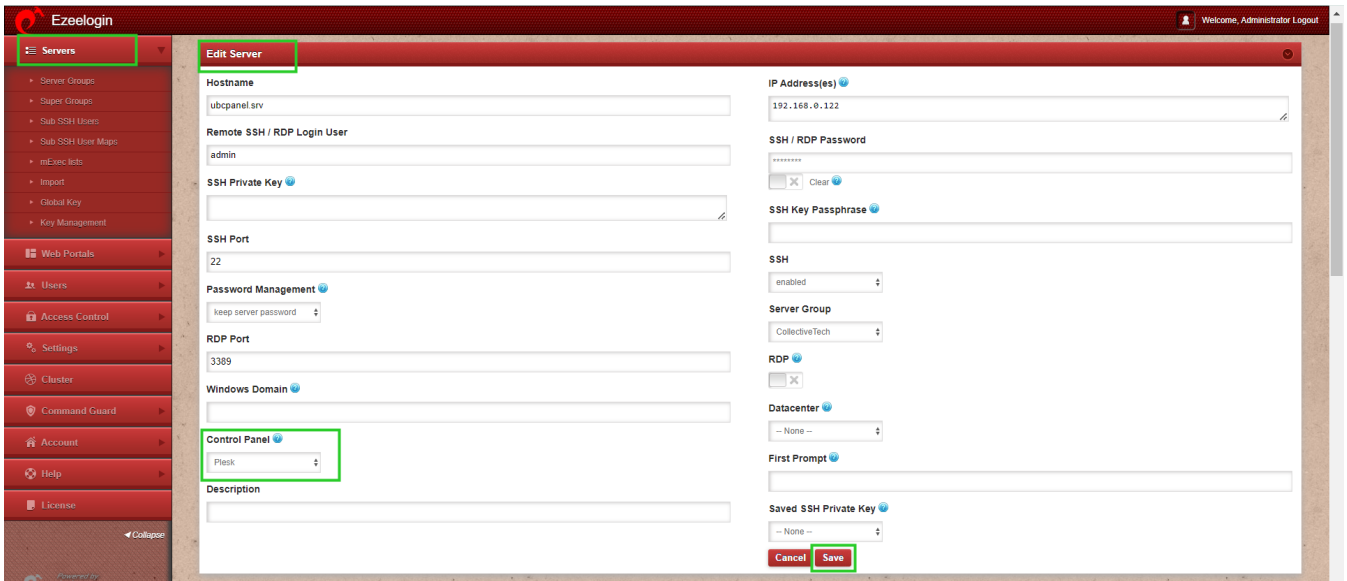

Field	Value
Name	Plesk
Description	Plesk admin panel
Port	8443
Protocol	HTTPS
Request URI	/login_up.php3
Request Method	POST
Username Field	login_name
Password Field	passwd
Username	admin
Extra Variables	bG9jYWxlPWRlZmF1bHQ=
Auth Type	Basic

At the bottom of the form, there are 'Cancel' and 'Save' buttons. A note indicates that HTTPS is highly recommended.

You can find the extra variables under the Inspect element of the Plesk website > Network > under userlogin > payload section > Form Data.

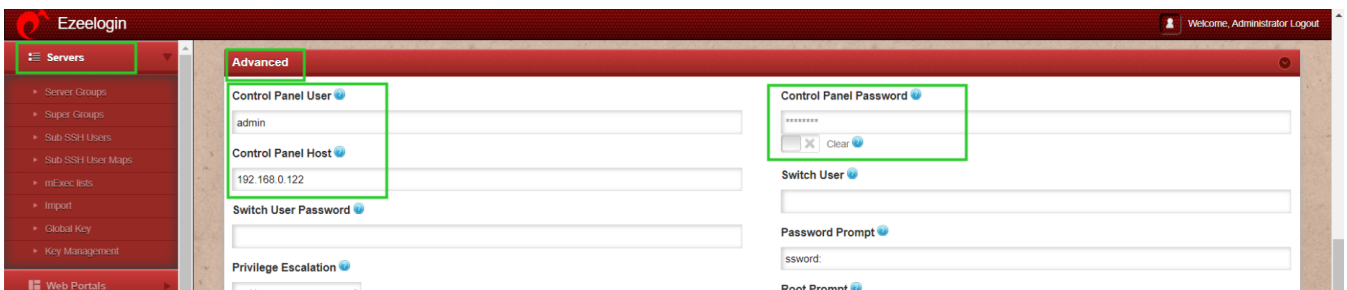

**Step 3:** After Adding the ControlPanel accordingly, Go to the Servers tab and select the control panel Plesk. that you have added as shown below:

Go to the Servers tab and add the Plesk installed server as shown below:

Make sure to select the control panel as Plesk from the drop-down menu.

**Step 4.** Also ensure that you have provided Control Panel User, Control Panel Password, and Control Panel Host under the Advanced section of Server Edit. You can refer to the screenshot below as an example:

**Step 5.** Refer to this article to [grant access](#) to users to have access to ControlPanel.

Click on the control panel icon to access Plesk that you have added.

Welcome, Administrator Logout
