How to Reset Duo Authenticator on a New Phone?

Overview: This article provides instructions on how to set up Duo if you are using a new phone and need to reset your Duo settings on the gateway server.

Step 1: Log into DUO.

Start by logging into your Duo account. Navigate to **2FA Devices > Phones** and select your previously used contact number.

Update the contact number as needed and save the changes.

Activate Duo Mobile

Activate Duo Mobile

This form allows you to generate a new activation code for this phone's Duo Mobile application. The Duo Mobile application allows the user to generate passcodes on their mobile device or authenticate via Duo Push.

Note: Generating an activation code will invalidate any existing Duo Mobile credentials for this device until it is activated with the new activation code.

Step 3: Download and setup DUO.

You will receive an SMS with instructions to download and set up the Duo Mobile app on your new phone. Follow these instructions to complete the setup.

Once the app is configured, you will be able to access the WebGUI using Duo authentication.

By following these steps, you can successfully reset Duo Authenticator on your new phone.

Emergency CLI Method:

- Run the below commands to disable and clear DUO 2FA. Replace the username to *disable DUO* for that user.

```
root@gateway:~# php /usr/local/ezlogin/ez_queryrunner.php "update prefix_settings set value='N'
where(name='enable_duo')"
```

```
root@gateway:~# php /usr/local/ezlogin/ez_queryrunner.php "update prefix_users set set_duo=0
where username='ezadmin'"
```
