Configure Cloudflare Turnstile Authentication 754 Rakhi November 8, 2024 Features & Functionalities 773

How to Enable Cloudflare Turnstile for GUI Authentication: A stepby-step guide.

Overview: This article provides a step-by-step guide for configuring Cloudflare Turnstile CAPTCHA for enhanced security and user verification.

<u>Cloudflare Turnstile</u> is a free tool that replaces traditional CAPTCHAs with challenges designed to confirm a visitor's authenticity without requiring them to solve a visual puzzle. It features invisible CAPTCHA technology, enabling users to pass verification seamlessly in the background without any interruptions..

Step 1: Enable Turnstile

The Turnstile for the GUI can be enabled by navigating under **Settings > General > Authentication >** Choose the option from **Login Captcha**.

WebGUI		Welcome, Administrator Logout
t≣ Servers ►	General Settings	Authentication Two Factor Authentication Security Defaults Miscellaneous
🖬 Web Portals 🕨 🕨	Password / Security Code Retries	Login captoha

☆ Account ►		

Step 2: Obtain Keys from Cloudflare

Log in to your <u>Cloudflare account</u> and access the 'Get Turnstile' option within the GUI. Here, you will find your Site Key and Secret Key.

Step 4: Login with Cloudflare Turnstile

Now, the turnstile set up is completed and you can log in to the webGUI using Cloudflare Turnstile for

added security.

>>> To *disable Cloudflare turnstile* from webGUI. Navigate to **Settings > General > Authentication** > locate login captcha and choose disable option.

This feature is available from **Ezeelogin version 7.39.0**. To update your existing Ezeelogin to the latest version, refer to the **article**.

Emergency CLI method:

How can you *disable cloudflare turnstile* login captcha from gateway server.

• Run the following command to update the login_captcha setting:

root@gateway:~# php /usr/local/ezlogin/ez_queryrunner.php "update prefix_settings SET value='N' WHERE name='login_captcha';"
