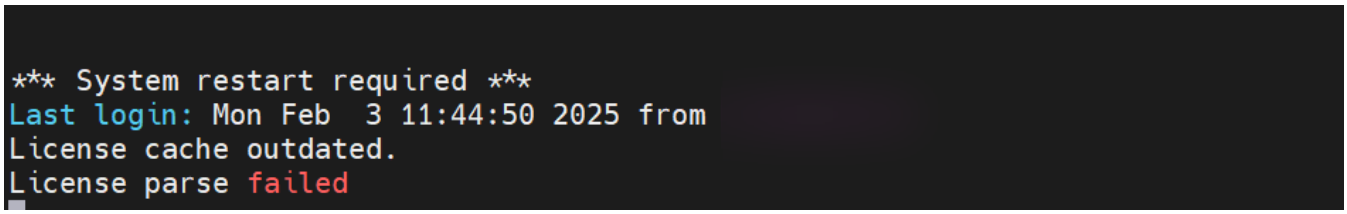
License cache outdated

762 Manu Chacko February 3, 2025 Common Errors & Troubleshooting 360

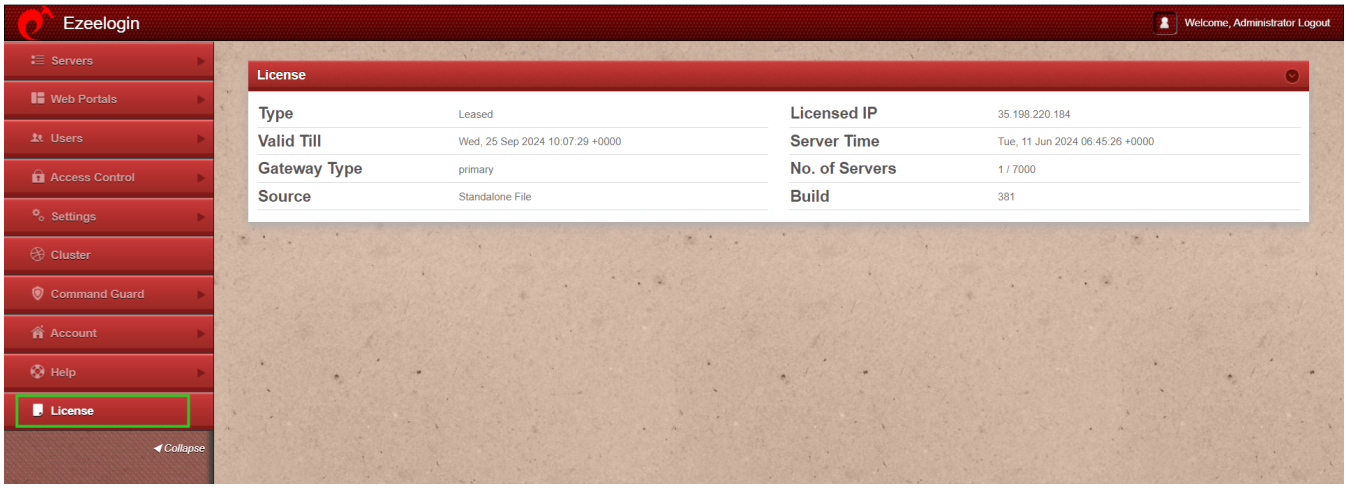
License parsed failed.

Overview: This article will help users fix the license issue where the error "License cache outdated: License parsed failed." appears in the Ezeelogin shell.



This issue occurs when the license cache is outdated.

Login to Ezeelogin software GUI and click on the license tab to update the license. Refer to the screenshot below.



Ensure that the license information in the License tab is up to date, and then log in to the Ezeelogin shell.
