

unable to start mysql in ubuntu 14 " logger command not found"

89 admin October 2, 2024 [Common Errors & Troubleshooting](#) 6964

## I get the error /etc/init.d/mysql: line 86: logger: command not found

---

1. We need to reinstall bsduutils in ubuntu 14 server **No longer supported**

```
root@gateway:~# apt-get --reinstall install bsduutils
```
